
Gonzalo Demian Cubilla

Calle 3 de febrero 145 • José C. Paz 1666, Buenos Aires • cubillagonzalo@outlook.com • +54 9 1137018186

Education

National Technological University
Technical degree in programming

Buenos Aires
2024-2026

Experience

Nimble Gravity
Full stack developer

Denver, US
2025 – 2026

- Maintenance and enhancement of an ERP system for vending machines, with multiple integrated applications, including a mobile wallet app, touch-screen interface, and support repositories
- Frontend and backend feature development using PHP (CakePHP), Next.js, Angular, and Ionic
- Implementation and integration of payment systems such as Clover and Fiserv ITD, ensuring reliable transaction processing
- Collaboration with agile, multidisciplinary teams to deliver scalable and maintainable solutions
- Improvement of system stability and code quality through continuous refactoring and adoption of best practices

Personal Projects

URL Shortener

Full stack project

2026

- Designed and developed a full-featured URL shortening service with capabilities such as custom URL aliases, statistics, user authentication, and URL tagging.
Url: [web](#)

Manga Library

Frontend project

2024

- A modern, minimalist CRUD application designed for manga, manhwa, and manhwa enthusiasts.
Url: [Chrome store](#)
